

SAKSOFT Limited appraised at CMMi Level 5

15/09/2006

Chennai: Saksoft Ltd has been appraised at Level 5 of the Capability Maturity Model® Integration (CMMI). Capability Maturity Model® Integration (CMMI) is a process improvement approach from Carnegie Mellon University's Software Engineering Institute and Level 5 denotes highest level of maturity.

The scope covers all its delivery centers in India and spans its entire service offerings from design, development and support of software applications for banking and financial services market and providing testing services as 3rd party testers. The assessment was conducted by KPMG, a leading international quality certification group.

Mr. Ramanathan, Executive Director of Saksoft added that, “the CMMi Level 5 accreditation confirms Saksoft's continual commitment to excellence in quality in every aspect - from addressing customer needs, ensuring predictable delivery, minimizing error-rate to providing defect-free software. Customers have already begun to see significant impact and that is reflected in their feedback”.

Saksoft is a software services company with a core focus on the Banking and Financial Services Industry (BFSI), delivering business value to its global customer base of banking and financial institutions. Saksoft has two development centres (Chennai and Noida) and offices in the US, UK, Germany and Singapore. The company has considerable experience in developing applications across Retail Banking, Corporate and Investment Banking arenas.
